

BERNISH VULN_SHIELD

Advanced Security Auditing & Vulnerability Management Platform

LIVE DEMO: <https://vuln-shield-k5fw.onrender.com>

CLIENT SALES PROPOSAL & PRODUCT PITCH

Ø=Üì Executive Summary

Bernish VulnShield is an all-in-one automated cybersecurity auditing platform that enables IT agencies, enterprises, and consultants to continuously scan websites, mobile applications, and source code for OWASP Top 10 vulnerabilities, leaked API keys, and security misconfigurations in under 60 seconds.

Ø<ß Core Product Modules & Capabilities

- #### 1. Web Vulnerability & OWASP Top 10 Scanner

Automated header auditing (CSP, HSTS, X-Frame), XSS & SQLi risk detection, SSL/TLS certificate validity checks, and CORS misconfiguration scanning.
- #### 2. Mobile App & Source Code Auditor

Parses AndroidManifest.xml for insecure permissions and scans codebases for exposed AWS, Stripe, Google API keys, and hardcoded secrets.
- #### 3. Device & Infrastructure Compliance Audit

Evaluates local system security, OS patch compliance, open listening ports, firewall configurations, and network risk exposure.
- #### 4. Executive PDF & HTML Audit Report Generator

Generates one-click white-label PDF/HTML reports complete with executive security scores (0-100%) and actionable code remediation snippets.
- #### 5. Admin Intelligence & Visitor Audit Trail

Tracks admin logins, IP addresses, geolocation data, and maintains active visitor audit logs for full compliance traceability.
